The FastBull Finance Summit was held at the Coca-Cola Arena, Dubai, in April 2025 for its first edition. The stock market world gathered (a happy few with brokers, and the legendary star, the pope of investment, Jim Rogers, who co-founded QUANTUM FUNDS with his colleague George Soros.

LEGENDARY JIM ROGERS IN FLESH IS ON STAGE ADVISING ON HOW TO INVEST THE BEST IN A THORN FINANCIAL FUTURE

Jim Rogers arrived at the end of the day of this conference, enriched by a succession of success stories, high-level coaching for traders and stock market speculators, debates around AI in FOREX, and of course, the volatility of cryptocurrencies, which have been in vogue since the meteoric rise of Bitcoin (currently \$91,180).

He arrived escorted by two young women helping him move, but once on stage, he was so alert and jovial that it's almost official to associate him with his legend: the greatest and most formidable investor in the world.

He began by presenting us his Millennium adventure, from 1999 to 2001 (i.e. during the passage to the Millennium) a world tour where

he crossed more than sixty countries, from west to east, in 3 years, according to the spots marked on the giant world map that he shows on the screen. We see him young, with his wife, and meeting local populations, by plane, camel, including the stage of the stamp on his passport. Until arriving at a very moving scene where his two daughters, speaking perfect Mandarin, impress a Chinese jury.

He confides "In my experience, if there is one country to visit, is India "

Jim Rogers then shared anecdote after anecdote, sharing his love of human nature and his thirst for learning about others and foreign cultures. He started from very little, followed by extensive studies after holding a bachelor's degree in history from Yale University and a master's degree in philosophy, politics, and economics from Oxford University's Balliol College. He and his wife, Paige, live in New York City with their young daughter, Hilton Augusta. Jim Rogers sold his New York City home and now resides in Singapore.

THE "SO CALLED" SELF-MADE JIM ROGERS IS A SHARP & SMART FINANCIAL EXPERT IMPRESSES BY HIS SIMPLICITY AND VERY PRAGMATIC GOOD SENSE

This self-made, educated, intelligent, and globally minded man has succeeded in finance, thanks to his flair but also his mastery of human psychology and sociology, going against the grain of the "norm." What is most striking are the very short and sharp answers to the questions, all based on pragmatic common sense, like a farmer anchored to the earth, or a cultivator in tune with nature and understanding the rhythm of life and physiology. This must be the famous "flair."

Thus, he built a financial empire with his colleague George Soros by founding Quantum Funds. Indeed, in 1970, Rogers joined the New York-based investment bank Arnhold and S. Bleichroeder, where he worked with Soros. In 1973, Soros and Rogers left and founded the Quantum Fund, which was one of the first truly global funds.

He explains that at his age, he fears being the sad witness of an unprecedented economic and financial crisis, placing his hopes on China, which he believes will soon dominate the global market.

This Singapore resident declares, "America has its great moments, and was an empire, but it also has its problems, and now it is the turn for China."

JIM ROGERS ADVISES INVESTING IN GOLD AND SILVER METAL IN THE FACE OF A FUTURE GLOBAL FINANCIAL CRISIS

During the two-day summit, renowned investor Jim Rogers offered wise advice as a keynote speaker at this event featuring industry experts, panel discussions, and networking opportunities at the Coca-Cola Arena.

Jim Rogers advises investing in gold and silver, whose rates will only continue to rise, and that believing the dollar is a safe haven is heresy. He himself holds a lot of dollars, but that "He seeks to interact with the audience, who dream of asking him questions because this great financial lord is rarely on stage since he retired at 38, and his word is worth his gold bar!" He humbly explains that he makes mistakes too, and that everyone should trust their own instincts.

"If you ask me about my first wife, that was a big mistake on my part," he confesses in a friendly and humorous way.

He pays great tribute to women, "his daughters, whom he thinks he anticipated well by offering them to learn Mandarin." "I hope that later they will take care of me as I get older." He adds that men should listen to women's advice when it comes to investing gold (just walk the streets of Gold SOUK in Dubai, the largest gold market in the world:) and that they would be much better advised to listen to their advice, rather than algorithms." "Silver is cheaper than gold, but it's going to grow fast as well as gold. I owe gold and silver, myself, they are the best insurance policy."

At a time when Jim Rogers, the world's financial markets have been plummeting for several days, following President Trump's repeated and aggressive announcements. on tariffs vs. vis-à-vis products exported to the USA Then he confides his fear in the face of a great global depression that he smells "I expect if we have a market problem, it means there is a debt problem; it's going to be the worst moment in my life"

JIM ROGERS IS NOT KEEN ON CRYPTOCURRENCY

He admits his aversion to cryptocurrency, even though he respects those who invest in Bitcoin.

Jim Rogers also confides that if any of the participants listening to him in the auditorium are about to create a new currency, they should go see them privately at the end of the session!

"We are reaching the lowest rate interest in history in the US, because people are very worried, and usually think that the US Dollar (\$) is a safe haven; it is not!" I've got plenty of US Dollars myself and storing them because when things are so bad and so strong, I'm worried as well about the world situation!" he admitted.

INSIGHTS BY JIM ROGERS OVER GLOBAL FINANCE & MIDDLE EAST

Our correspondent asked him this question:

USPA QUESTION: To our question about Christine Lagarde, CEO of the ECB,'s announcement that "The euro will be digital by October 2025," he said, "not much, because she has little interest in the euro and focuses on the Southeast Asian region, and in particular, "It is the Century of China. China is going to be the next target country in the world, whether you like it or not," he claimed. He insists, "Please, I hope that your children must learn Chinese," adding, "in a hundred years from now, you must be ready, and that's why my daughters learned Chinese," quoting his own daughters, who speak Mandarin fluently, based on a rather visionary intuition some thirty years ago!" He predicts that America will plunge as well as Europe, and that only "China, and Central Asia, and the middle east will escape."

He added that the more President Trump says "don't worry its gonna be ok, I get more worried". Source: Report By Rahma Sophia RACHDI
